

Amprime Ace - NC

Amprime Ace - NC is a non-chloride based accelerating admixture for higher early strength of concrete at sub-freezing temperatures (cold weather)

Applications:

1. Compatible with all types of cement.
2. In Molded concrete's
3. Traditional Construction
4. Highly suitable for cold weather
5. Generates hard concrete at early stage.

Advantages:

1. Enable compressive and flexural strengths.
2. Improves work efficiency
3. Faster Finish and easy stripping of concrete mold.
4. Accelerated strength gains allowing faster completion of work.
5. Protects concrete freezing at cold temperature

Packaging:

1L, 5L, 20L, 200L, 1000L on as per requirement.

Dosage:

250 ML in 1 Bag of Cement (per bag 50Kg)

Storage:

Store in a dry place.

Room Temp 5°C to 40°C

Shelf Life:

1. 12 Month From date of manufacturing, if kept unopened and originally sealed.
